FEBRUARY, the month of VALENTINES, LOVE, and Presidents birthdays. Oh yes, don't forget the groundhog. But what interests us is painting, teaching, and preparations for a great meeting at ST. Simons.

HOW EXCITING!!

Have you sent your registration in yet? Have you sent in your dues yet? ST. SIMONS REGISTRATIONS ARE SOON DUE, BUT ANNUAL DUES ARE PAST DUE NOW.

I recently attended an exhibit of Florida's famous "HIGHWAYMEN" artists who were inducted into the Artists Hall of Fame in 2004. Most people across the nation and even in Florida never heard of them. In the 1950's and 1960's a group of 26 African American artists from Fort Pierce, Florida learned to paint with famous artist Beanie Bacchus. 9 of them are still living. They painted about 200,000 paintings and sold them out of their cars, so they were dubbed the Highwaymen. They worked in oils, with the wet-in-wet method using vibrant colors depicting rural Florida idyllic landscapes. Gorgeous sunsets, palm trees, colorful Royal Poinciana trees, everglades, and other sea shore scenes. Three artists were present at the exhibit and I and my son watched and chatted about art as Robert Lewis painted one of his striking beautiful paintings. He is most delightful and enjoys his work. I have taught hundreds of wet-in-wet paintings, and as I watched him, I picked up another brush stroke. You are never thru learning, so keep your mind open to new avenues. I shared a couple tips, and he said, "I'm listening", so he too was enjoying our exchange. This brings to my mind, that I would like some of you to share tips and techniques with our members, so please contribute to our newsletter.

SOMETHING TO REMEMBER THE NEXT TIME YOU LOSE POWER!

I have a friend who used her solar lights inside at night when her current was off during the hurricane. She stuck them in a jar or bottle and said they gave off plenty of 'free light'. She put one in each room and would put them back outside in the daytime and bring them in at night as long as the current was off. They are safe to use and cheaper than batteries. Bring in a solar light one night and test it. Due to a thunderstorm, we lost power for about 5 hours. We were scrambling around in the darkness, looking for matches, candles, flashlights, etc. We looked outside, and

noticed our solar lights shining brightly all around our patio, stairs, dock, etc. They were beautiful. My wife walked outside, and brought several of the solar lights inside. We stuck the solar light pipes into plastic drink bottles containers and they made the nicest, brightest, safest, lighting you could ever imagine. We put one in the bathroom, the kitchen, the living room, etc. There was plenty of light. There are all types of solar lights available. We bought ours at Harbor Freight. We put them all around our yard. They look nice and they do not attract flying bugs like the outdoor lights around our doorway. The lights we have fit into the small (20 oz) water bottles and they also fit into most of the larger liter bottles. If you need a weight in the plastic bottle to keep them from tipping over, you can put a few of the pretty colorful "flat marbles" that they put in aquariums, and vases. (you can also use sand, aquarium gravel, etc., whatever you have available). The lights we have were perfect inside our home. They burn all night long if you need them. The next day, you just take your solar lights back outside and they will instantly recharge and be ready for you to use again any time you need them. Perfect for power outages, hurricanes, etc. Gloria
